## CAREER OBJECTIVE

As a fresher I am actively looking for job opportunity as a Java Full Stack Developer where I can leverage my expertise in Java, HTML, CSS, Bootstrap, JavaScript, React.js and Oracle to design and develop innovative web application and websites, while continuously enhancing my technical expertise and advancing my career in software development.

## EDUCATION

2021 - 2025

### Beachelor of Technology in Computer Science Engineering

Meerut Institute of Technology, Meerut

75.6%

## TECHNICAL SKILLS

- **Frontend:** JavaScript, React JS, Next JS, Redux Toolkit, HTML, CSS, Bootstrap, Material UI (MUI)
- **Backend:** Java
- **Frameworks:** Spring & Spring Boot
- **Tools:** Maven, Gradle, Eclipse, STS, VS Code, Postman, Junit5, Swagger
- **Databases:** MySQL, Oracle, MongoDB
- **Version Control Tools:** Git, Github

## PROJECTS

### SmartSchool ERP | Java Full Stack Project

- Developed a full-stack School ERP Management System to manage students, teachers, attendance, fees, exams, library, and user records efficiently.
- Implemented secure authentication and role-based authorization (Admin, Teacher, Student, Parent) using Spring Security and JWT.
- Built responsive and user-friendly frontend interfaces using React.js, Bootstrap, and Axios for seamless user experience.
- Developed and integrated RESTful APIs using Spring Boot, Hibernate/JPA, and connected with MySQL/TiDB Cloud database for data management.
- Implemented modules like Student Management, Teacher Management, Attendance, Fee Management, Exam Tracking, and Library System.
- Used Git and GitHub for version control and deployed the application using Render (Backend) and Netlify (Frontend).
- Improved application security and performance by implementing JWT token-based authentication and protected API access.
- **Technologies Used:** Java, Spring Boot, Spring Security, JWT, Hibernate, React.js, MySQL/TiDB Cloud, REST API, Bootstrap, Git, GitHub, Render, Netlify.

## E-Commerce | Java Full Stack Project

- Developed a full-stack E-Commerce Web Application for online shopping with features like product browsing, cart management, order placement, and secure user authentication.
- Implemented role-based authentication and authorization (Admin & User) using Spring Security and JWT for secure access control.
- Built responsive and interactive frontend interfaces using React.js, Bootstrap, and Axios to provide a smooth shopping experience.
- Developed and integrated RESTful APIs using Spring Boot and Hibernate/JPA for product, cart, order, and user management.
- Implemented key modules such as User Registration/Login, Product Management, Category Management, Shopping Cart, Order Management, and Payment Flow.
- Designed and managed database operations using MySQL for storing product details, user information, and order history.
- Used Git and GitHub for version control and deployed the application for online accessibility.
- Enhanced application performance and security using JWT authentication, API protection, and optimized database queries.
- Technologies Used: Java, Spring Boot, Spring Security, JWT, Hibernate, React.js, MySQL, REST API, Bootstrap, Axios, Git, GitHub.

---

## **CERTIFICATIONS**

- Java Full Stack Certification from Naresh IT, Hyderabad.
